## I. INTRODUCTION

On September 12, 2011 the South Windsor Board of Education adopted the *South Windsor Public Schools 2011-2014 Strategic Plan*. Among other initiatives, the plan called for the development of a “long-range elementary facilities plan that promotes a safe, engaging learning environment that is accessible to all students and community members.” Further, it specifically called for a “staggered” construction and referenda approach. In response to the Board of Education’s directive, the superintendent brought forth a formal recommendation regarding such a plan on October 15, 2013. After several sessions of deliberation, the Board of Education unanimously and enthusiastically adopted the “South Windsor Public Schools Elementary Schools Master Plan” on October 29, 2013.

To initiate planning for Phase II of the Elementary Schools Master Plan, South Windsor Board of Education engaged the services of Colliers International, Drummey Rosane Anderson, and Daniel Hansen, educational consultant and former assistant superintendent, to assist with the creation of these educational specifications. The following individuals participated in specific program meetings to provide input for these educational specifications:

Ramona Adesso, Library Manager, Wapping	Jennifer Hoffman, Social Worker, Eli Terry
Steven Albrecht, K-12 Educational Tech. Curriculum Specialist	Gregory King, Director of Dining Services, Chartwells
Jennifer Ballok, PE, Eli Terry	Jessica Kuckel, K-5 Special Education Supervisor
Nancy Bassilakis, Math Coach and Intervention, Eli Terry	Stephanie Kuckel, Grade 2, Pleasant Valley
Tori Basso, Grade 1, Orchard Hill	Rebecca LaGrange, Kindergarten, Pleasant Valley
Lauren Beeler, PE, Philip R. Smith	Kim Lavado, Reading Consultant, Wapping
Rebecca Birdsey, Grade 5, Wapping	Susan Leach, Music, Eli Terry
Kate Botticello, Kindergarten, Eli Terry	Robert Lesser, EL Teacher, Philip R. Smith
Sarah Bryan, Grade 3, Eli Terry	MaryAnn Lopez, former Director, Food Services
Kelly Burke, Reading Consultant, Philip R. Smith	Lisa Lovett, Secretary, Philip R. Smith
Maura Buyak, Reading Consultant, Eli Terry	Andrea Marshall, Art, Eli Terry
Tiffany Caouette, Principal, Pleasant Valley	Scott Matchett, Director of Technology Operations and Services
Caron Carpenter, Grade 3, Pleasant Valley	Charissa Mayer, Special Education, Philip R. Smith
Kate Carter, Superintendent	Carl McAvoy, Head Custodian, Philip R. Smith
Nick Canova, K-12 Art Curriculum Coordinator	Al Mothersele, former Director, Technology Systems & Programs
Sara Chamberlain, Administrative Secretary	Sue Nadeau, Nurse, Wapping
Douglas Couture, Director of Technology Systems and Programs	Karen Newcomb, Medically Fragile Program, Wapping
Eileen Crawford, Music, Philip R. Smith/Pleasant Valley	Patricia Pelletier, Clerk, Orchard Hill
Karen Czapla, Grade 3, Orchard Hill	Angelina Racco, Psychologist, Eli Terry
Lynsey Desmond, Art, Philip R. Smith	Julie Ratajczak, Math Coach and Intervention, Philip R. Smith
Colleen Devita, EL Tutor, Eli Terry	Meghan Rhodes, Grade 1, Wapping
Marlene Dickison, Secretary, Eli Terry	Diane Rizzo, Special Education, Orchard Hill
Michelle Dixon, Principal, Philip R. Smith	Pam Roberts, K-5 Math Enrichment, Districtwide
Travis Edwards, K-8 PE/Health Curriculum Coordinator	Suzanne Robinson, Grade 2, Eli Terry
Denise Epps, Director, Special Services	Evelyn Russo, Nurse, Eli Terry
Ray Favreau, Director of Parks and Recreation	Melissa Simmons, Grade 2, Philip R. Smith
Vincent Federici, Principal, Eli Terry	Rebecca Slater, Grade 1, Philip R. Smith
Janet Giammarino, Special Education, Eli Terry	Karen Stoj, K-12 EL/World Language Curriculum Specialist
Patrick Hankard, Director of Facility Operations	Arnica Sullivan, K-12 Science Curriculum Specialist
Colleen Henegan, Nurse, Philip R. Smith	Jo-Ann Thomas, K-12 Music Curriculum Coordinator
Ruth Hertel, Library Manager, Eli Terry	Jen Williamson, Kindergarten, Eli Terry
Laura Hickson, Principal, Wapping	Christine Zampicini, Library Manager, Philip R. Smith
Carey Hill, Kindergarten, Philip R. Smith	Christine Zerella, Kindergarten, Orchard Hill

## II. LONG RANGE PLAN / PROJECT RATIONALE

South Windsor Public Schools currently has five elementary buildings. These buildings range in age from 51 to 63 years old. The Elementary Schools Master Plan provides for school buildings that:

- Create learning environments designed for current instructional strategies;
- Benefit from needed technology upgrades;
- Comply with current building and fire codes;
- Incorporate contemporary design for school safety;
- Utilize modern, efficient heating and cooling systems; and
- Provide accessibility to all by meeting the requirements of the Americans with Disabilities Act.

The plan consists of a three-phase approach that will use multiple referenda and staggered construction schedules to address our needs over the next decade. Specifically, the plan consists of the following overarching components:

- Three-phase approach/staggered referenda
- Operate one fewer elementary school, moving from five (5) schools to four (4)
- 1-2-1 Referenda Schedule
  - Phase One: Address one school in first referendum
  - Phase Two: Address two schools in second referendum
  - Phase Three: Address final school in third referendum

**Phase One** called for the construction of a new PK-5 school on the Orchard Hill site, which allows for the original Orchard Hill Elementary School to serve as “swing space” for future phases of the Elementary Schools Master Plan. The creation of swing space is necessary so that when two other school buildings are under construction, students are able to attend the original Orchard Hill Elementary School building during the construction period. At the close of Phase One, Wapping Elementary School students will be redistricted to one of four other elementary schools. Ultimately, the Wapping Elementary School building will be turned over to the town. The referendum for Phase One passed in March 2014 and construction began in February 2016.

**Phase Two** calls for the construction of new K-5 schools at the Eli Terry site and the Philip R. Smith site. Ultimately, the original Eli Terry school building will be razed to allow for the construction of playgrounds and replacement ball fields. Eli Terry students will remain in the original Eli Terry building while their new school is being built. Philip R. Smith students will be relocated to the original Orchard Hill Elementary School building while their school is under construction.

**Phase Three** calls for the new construction of a new K-5 school at the Pleasant Valley site. Pleasant Valley students will be relocated to the original Orchard Hill Elementary School building while their school is under construction. Once the original Orchard Hill Elementary School is no longer needed for swing space, the building will be turned over to the town. The Town Council would determine if the building should be razed or repurposed.

## III. THE PROJECT

**Objective:** To ensure all South Windsor children are able to attend a school that is safe, modern, compliant with current building codes and able to support their educational program; to facilitate completion of the Elementary School Facilities Master Plan by exploring the feasibility of consolidating populations and improving school buildings to support programs that meet the needs of South Windsor students, their families, and the community.

The following project specifications for the new Eli Terry school were developed using data from the October 2015 Prowda population study as well as a study conducted in June 2016 by Milone & MacBroom (MMI). MMI has been developing projections that account for recent trends in housing, economics and neighborhood level demographics. The projections are incorporated into MMI’s Geographic Information Systems, which allows for scenario planning as part of the redistricting process. Each redistricting scenario was analyzed for future enrollment, impact on transportation and right-sized to the proposed school construction program.

## Phase Two

- **School:** **Eli Terry Elementary School**
- **Project Type:** New Construction
  - Total Program Area: **46,610** square feet
  - Total Building Area (inside face of walls): **64,025** square feet
  - Total Gross Square Feet (outside face of walls): **66,586** square feet
- **Construction Timeline:** March 2019 – May 2020
- **Design Enrollment:** **463** students\*
- **Upon Completion:**
  - Eli Terry students will move into the new building in Summer 2020
  - The original Eli Terry building will be demolished during the summer of 2020 to create space for new ball fields and play areas.

*\* Assumes approximately 89 students from Wapping Elementary, including two special education programs: the Medically Fragile program and the Elementary Intensive program*

## IV. CAPACITY DATA

Eli Terry Elementary currently houses 362 students in grades K – 5 and an additional 90 Pre-K students. At the completion of Phase One, all Pre-K students will transfer from Eli Terry to the new Orchard Hill facility. The enrollment projections for the new Eli Terry account for approximately 89 students redistricted from Wapping to Eli Terry, including the relocation of two special education programs: the Medically Fragile program and the Elementary Intensive program.

## V. OVERVIEW OF PROGRAMS

### GENERAL EDUCATION

The features of elementary classrooms that have to be considered when housing groups of school children for instructional purposes can be divided into three (3) classifications: (1) Early Childhood – Pre-K and Full-Day Kindergarten; (2) Early Elementary - grades one and two; and (3) Intermediate grades three, four and five. The classroom needs of all elementary children will require flexibility of space, portability of furniture and acoustical treatment of environment. This will be accommodated while still providing low height furnishings and more space for group instruction that will range from total class involvement to three or four separate groups doing different activities at the same time. Space should also be provided for students to read, write, research, and study for either individual or small group projects. The learning environment must also accommodate space for multiple adults (specialists) who work with students within the general classroom environment. All instructional classrooms require storage space for items such as classroom libraries, textbooks, reference materials, supplemental books, supplies, science equipment, charts, globes, computers, calculators and audio-visual equipment.

The outside play area for the early elementary and intermediate levels must be extensive and varied to accommodate activities that range from the minimal space demands of jump rope to larger areas needed to play soccer, kickball, softball, etc. This play area should be away from instructional spaces, if possible. Ideally, this play area should be in close proximity to gymnasium and cafeteria for easy access. The kindergarten play area should be near the kindergarten classrooms, depending on the design of the school and proximity to other classrooms.

Our General Education program includes curriculum focused on Art, Music, and Physical Education, STEM and World Languages. Support Services include Media Center and Technology Support integrated throughout the learning environments. Facilities for these areas need to be specific to each program's purpose yet allow for flexibility of space as with the K-5 classrooms. Further, these facilities should be pleasant and inviting to encourage students, staff and the community to fully support them and to benefit from them.

As the K – 5 program requires that students travel to these various program areas periodically during the day, consideration should be given to the student traffic that will result from this academic arrangement. Student proximity

to the library/media center, STEM lab, gymnasium/auditorium, instrumental/general music and art rooms should also be considered.

A platform off of the gymnasium will serve as a stage area for school assemblies, performances and other events. It will be adjacent to the gymnasium and accessible from the main corridor. The platform will be accessible and code compliant with ramp access. Included in the design will be stage draperies and main curtains, as well as adjustable stage and general lighting. An electronically controlled acoustical wall will be installed at the proscenium to allow the space to be used for a variety of small group activities, book fairs, and/or rehearsals on the platform while the gymnasium is in use.

Additional instructional space is necessary to provide support for non-identified students, as prescribed in the Scientific Researched Based Intervention (SRBI) requirements of the Connecticut State Department of Education. General Education Intervention Services is comprised of Reading, Mathematics and English Learner support (EL). Each of these three rooms will be centrally located within the classroom area of the building. The reading and math areas will be staffed by the reading consultant, early literacy and math interventionists, and supported by various paraprofessionals. These rooms will be utilized for individual testing, individual and small group instruction.

## **SPECIAL EDUCATION**

Special Education programs include a K-5 Medically Fragile Program, a K-5 Elementary Intensive Program that serves children with autism and other special needs, K-5 Special Education Resource, Occupational/Physical Therapy (OT/PT) Services and Related Services (Social Work, Psychologist, Speech/Language/Hearing).

Classrooms for special education/related service teachers should be able to meet the needs for small group instruction. They will need to be of sufficient size to accommodate children who require specialized equipment. Rooms will be used for individual testing, confidential meetings with parents and/or students, individual and small group instruction, counseling, and staff conferences.

## **SUPPORT SERVICES**

### **MEDIA CENTER**

The Library Media Center of an elementary school is a multi-purpose room. It should be bright, colorful and attractive as well as warm and inviting, and meet the needs of the students it services. It is important that the media center be designed with the student's safety in mind. There should be freestanding 4 ft. high, double-faced shelving allowing one (1) adult to see the entire area. The area must be spacious enough to house an appropriate print and media collection. There should be room for multiple classrooms to use this resource on an independent basis. The room is divided so that most space is used as the public area. A small story corner, a production area for teachers, provision for six (6) computer workstations for research and access to online card catalogue as well as a circulation area located near an exit door is also required.

### **TECHNOLOGY**

A contemporary elementary school must be able to support varied uses of technology. In particular, the school's infrastructure should reflect the latest in wiring and cabling, which would support current technology applications as well as future requirements. Internet access must be readily available throughout the school. Computers should support the full range of educational and operational functions in the school. To that end, it is recommended to invest in sufficient number of iPads (K-2) and Chromebooks (gr. 3-5) for all students in lieu of investing in a separate computer lab.

A small video production lab is also required as a multi-media technology studio. This could be adjacent to the media center and/or the STEM lab.

Wiring for all classrooms will include network drops and multiple electrical outlets. The entire facility will have wireless connectivity to support the implementation of mobile devices such as laptops, netbooks, and other Internet-ready devices.

## VI. CLASSROOM SPECIFICATIONS

Unless otherwise noted, the standard furnishings for every classroom noted below are expected to include the following:

- Room darkening shades
- Acoustical insulation for soundproofing
- Air conditioning
- ADA compliant building standards
- Wireless/internet access to support at least 30 mobile devices
- Multiple electric outlets
- Sound Field System
- Telephone
- Intercom on hands free communication with office

## VIII. COMMUNITY USE

All of our schools are used by the community. Some of the groups that regularly use the facilities include:

- South Windsor Parks and Recreation Department
- Scouting organizations
- Civic organizations
- Municipal boards and groups
- Adult Education
- PTO
- Registrar of Voters
- Religious education classes

## IX. ENVIRONMENT – SYSTEMS – EQUIPMENT

SYSTEM	SPECIFICATIONS
<b>Building Systems</b>	<ul style="list-style-type: none"> <li>• The building systems incorporated into the new construction will be designed in accordance with Connecticut High Performance Building standards, equivalent in performance to a LEED Silver rating.</li> </ul>
<b>Heating/Cooling (HVAC) System</b>	<ul style="list-style-type: none"> <li>• Heating &amp; cooling should be produced with natural gas with a boiler for heating and roof top DX cooling. Consider including Geo-thermal wells for energy efficiency.</li> <li>• All spaces are to receive air conditioning, but only those areas with summertime use will have the systems running year-round; all other areas will have systems set to dehumidification only during summer months.</li> <li>• In-line water heaters for domestic hot water shall be provided during non-heating season usage.</li> <li>• Use in-slab hydronic heat delivery at the lower levels for Kindergarten classrooms.</li> <li>• Energy recovery units, VFD fan systems and pumps to be utilized in the design.</li> <li>• Perimeter heating will be provided by fin tube radiation and the possible use of ceiling mounted radiant panels, cooled by a VAV system with each room served by a dedicated VAV box and hydronic reheat coil.</li> <li>• The use of “chill beams” will be considered for general heating and cooling. Designer to provide additional information on chill beam systems to Owner.</li> <li>• The gymnasium/auditorium and cafeteria will be served by separate variable speed air handlers. Air handlers shall include a hot water heating coil and DX cooling coils.</li> </ul>
<b>Climate Controls/Ventilation System</b>	<ul style="list-style-type: none"> <li>• The building will be designed with Direct Digital Control (DDC) systems (Invensys), centrally tied into the School Facilities Department via Graphical User Interface.</li> <li>• Spaces should have independent, on demand heating, cooling and ventilation control for operational efficiency.</li> <li>• Each classroom will be provided with a temperature sensor and carbon dioxide sensor. The carbon dioxide sensor is an energy saving device. By sensing the carbon dioxide within the room, the outside air intake is adjusted, reducing the amount of outside air being heated or cooled, resulting in less energy used.</li> <li>• Climate controls/ventilation systems need to meet current codes and standards.</li> </ul>
<b>Lighting System</b>	<ul style="list-style-type: none"> <li>• Efficient and appropriate natural lighting will be maximized within the facility as appropriate for the programmatic use of the spaces.</li> <li>• Motion sensors and dual switching will be installed in classrooms.</li> <li>• The use of fluorescent lights throughout, with exceptions in specialty areas.</li> <li>• Attention should be given to security lighting for both interior and exterior of the building.</li> <li>• Emergency back-up will be via local battery ballasts.</li> <li>• The use of light shelves and light sensors for natural light to reduce electrical load shall be considered in locations where possible.</li> </ul>
<b>Electrical (Power) System</b>	<ul style="list-style-type: none"> <li>• Power to be provided by local utility company.</li> <li>• Consider solar roof mounted.</li> <li>• Distribution will include customer metering.</li> <li>• Emergency (whole building) generator to accommodate Life Safety needs.</li> </ul>

SYSTEM	SPECIFICATIONS
<b>Technology</b>	<ul style="list-style-type: none"> <li>• There shall be a combined voice/data system with “VOIP” (Voice Over Internet Protocol) design.</li> <li>• The school shall have ceiling mounted projectors with media controlled both locally from the teacher’s station and with a centralized media system at the head end (“DIVOS system”).</li> <li>• Head equipment to be housed in an MDF with 24 hour environmental control.</li> <li>• Horizontal cabling shall be Category 6e or contemporary equivalent.</li> <li>• Cable shall be run in corridors to support horizontal cable structure.</li> <li>• Fiber back bone between the MDF and IDF rooms shall be multi-mode type (10GB minimum).</li> <li>• Fiber optical cable from street to MDF</li> <li>• Make new Data center</li> </ul>
<b>Security</b>	<ul style="list-style-type: none"> <li>• Digital video surveillance of exterior/interior areas of the building</li> <li>• Electronic security system with keypad access control installed into the school.</li> <li>• Design the plan to prevent access to instructional areas of the school when community events take place in assembly areas during non-school hours.</li> <li>• Motion sensors shall be mounted in corridors.</li> <li>• Respond to future state and/or federal mandates related to security requirements for elementary facilities.</li> <li>• Door locks shall be Schlage and integrated with existing SWPS system.</li> </ul>
<b>Phone System</b>	<ul style="list-style-type: none"> <li>• A comprehensive, district-integrated phone system (dial-out) will be integrated into technology scope of the project, including hands-free and handle options.</li> <li>• Install phones in every room of the facility occupied by teachers or students at any given time, including all support and instructional spaces.</li> <li>• Provide Voice Over “IP” options.</li> </ul>
<b>Public Address</b>	<ul style="list-style-type: none"> <li>• The building’s public address system is comprehensive and will be addressed as part of the technology component of the project to incorporate internal building communications as well as external communications.</li> <li>• The PA system should be developed in conjunction with the phone, clock, data, voice and DIVOS video distribution system of the school.</li> <li>• Secondary access to security and public address systems will be located in the MDF/Head End Room.</li> </ul>
<b>Clocks</b>	<ul style="list-style-type: none"> <li>• Clocks, similar to the phone system will be integrated into the technology component of the project.</li> <li>• All support and instructional spaces will be included.</li> <li>• System to have manual override capability in the event that Daylight Saving Times are adjusted by the Federal Government.</li> </ul>
<b>Plumbing System</b>	<ul style="list-style-type: none"> <li>• Plumbing fixtures/system will be designed per current and applicable codes.</li> <li>• Fixtures will be self-operating</li> <li>• Plastic piping to be considered for domestic water and heating where possible.</li> <li>• Floor drains in gang toilet areas</li> <li>• Plumbed for full whole building sprinkler system</li> </ul>
<b>Fire Protection</b>	<ul style="list-style-type: none"> <li>• Building will be fully protected by a sprinkler system installed per NFPA 13.</li> </ul>
<b>Fire Alarm</b>	<ul style="list-style-type: none"> <li>• The building will be protected by a fully addressable analog, manual and automatic fire alarm system.</li> </ul>
<b>Acoustics</b>	<ul style="list-style-type: none"> <li>• The building will comply with ANSI S12.60-2002: Acoustical Performance Criteria, Design Requirements and Guidelines for Schools.</li> <li>• Suspended acoustical ceilings and/or acoustical decks will be installed throughout the building.</li> <li>• Corridor walls should be constructed of glazed concrete masonry units, or materials with a comparable NRC rating, and provide an adequate separation for sound control.</li> <li>• In specialized areas, such as media centers, appropriate acoustical treatments will be installed.</li> <li>• Sound field system will be provided in each classroom.</li> </ul>

SYSTEM	SPECIFICATIONS
<b>Windows/Doors</b>	<ul style="list-style-type: none"> <li>• Windows should be high efficiency, non-operational type with low e-glazing.</li> <li>• Emergency egress windows and rated doors will be installed in accordance with applicable codes.</li> <li>• Key fobs, thumb latches, vision panels – review with District and integrate with security section.</li> <li>• Door locks shall be Schlage and integrated with existing SWPS system.</li> </ul>

**X. SITE DEVELOPMENT**

There will be two primary entrance areas to the building: (1) the Main Entrance for visitors and parent drop off/pick up, and (2) student entrance for bus drop-off/pick up. Passive security measures, such as visual control of the entrances from the adjacent office area, must be planned for. Active security measures and systems will be developed with the building design. Adequate lighting for monitoring activities and ensuring safety are of paramount importance at the building entrances. Each entrance area should accommodate a separate bus loading and parent drop-off area. Entry overhangs or covered walkways will be provided for inclement weather to the extent practicable.

Bus loading areas should be configured as a one-way drive in a direction to assure that loading and unloading of students occurs from the right-hand side of the vehicle adjacent to the building. The drive will have two lanes: one for travel, and one for stopping and unloading. The bus loading driveway should be located such that buses exit upstream of automobiles, thereby reducing delays.

Parent drop-off areas will also be configured as a one-way drive in a direction to ensure that loading and unloading of students occurs from the right-hand side of the vehicle adjacent to the building. Student drop-off and pick-up areas are to be separated from the bus loading area, and preferably should be separate from other parking lots.

Parking for staff and visitors will be developed to take the multiple uses of the building into account. In determining the size and location of the parking lots, consideration will be given to the use of the building for community access as well as student safety. ADA and other code requirements will be addressed in the design of parking.

Sidewalks will be featured around the perimeter of the school, and shall be concrete with monolithic concrete curbing. Access to the parking lots, playfields, bus and parent pickup/drop-off areas, and access for student walkers will be addressed. Sidewalks should be designed to accommodate students who walk or ride bicycles to school. The number of driveways that are crossed by sidewalks should be eliminated/minimized as much as practicable.

Playgrounds will include paved (dry) play areas, replacement baseball and soccer fields, and new playscape equipment. Kindergarten play areas should be located in close proximity to their classrooms. Intermediate play areas should be located away from classroom areas, and in close proximity to the gymnasium. Playfields should be located in close proximity to the Gymnasium.

Playfields, parking, service drives, drop-off zones and bus zones should be located to reduce the cost of connecting elements without requiring pedestrians to cross vehicular traffic lanes. The location of driveways, walkways and landscaping must permit adequate sight distances for both vehicles and pedestrians.

Site utilities and physical plant components, including drives and access roads, will be located to avoid conflict with student and vehicular traffic, as well as the planned future growth of building components.

Landscaping will be designed to allow the school to blend with the environment as well as to provide passive cooling and windbreaks when possible. Trees and other greenery will be of a hearty variety and require little maintenance and which complement the building and site. Trees will be planted a sufficient distance from the building to avoid future maintenance problems. Consideration will be given to safety and security when placing foliage around walkways and areas of building access.
