## From: Tracie Peterson, Assistant Superintendent for Curriculum \& Instruction <br> Subject: Summary of 2022 Student Assessment Results - Smarter Balanced, NGSS, and CT SAT

This report provides an overview and summary of district assessment results for standardized tests that were administered in the spring of 2022. The information included below provides context for comparing district results with the performance in the state and District Reference Group (DRG) B which will be presented at the Board of Education meeting on September 27, 2022. The report also includes next steps recommended through collaboration with Candice Irwin, Robyn Ongley and Arnica Sullivan, K-12 Curriculum Specialists for English Language Arts, Mathematics and Science, respectively.

## I. Overview

The state of Connecticut has transitioned to state assessments which are aligned with the state standards for each core curricular area. The Connecticut Smarter Balanced assessments (SBAC) are aligned to Connecticut Core Standards in English language arts/literacy and mathematics and are administered yearly in grades $3-8$. The Connecticut SAT is administered to all students in grade 11, and tests proficiency in the areas of ELA and mathematics. The Next Generation Science Standards (NGSS) test is administered in the spring in grades 5, 8, and 11. Due to the COVID-19 pandemic no state testing was administered in the school year 2019-2020.

To summarize the state testing requirements, the following table illustrates each of the assessments administered to students in the spring of 2022:

|  | $\mathbf{3}$ | $\mathbf{4}$ | $\mathbf{5}$ | $\mathbf{6}$ | $\mathbf{7}$ | $\mathbf{8}$ | $\mathbf{1 1}$ |

## II. Smarter Balanced Assessment - Grades 3-8

SBAC assessments for ELA and mathematics were administered in the spring 2022 to students in Grades 3 through 8. Results are reported among performance levels 1 through 4 (from 1, "Does Not Meet Achievement Level" to 4, "Exceeds Achievement Level"). Table 1 and Table 2 below provide the South Windsor data for ELA and mathematics, respectively. (See DRG B comparisons in Appendices A and B.)

## III. Next Generation Science Standards - Grades 5, 8, and 11

NGSS assessments were administered in the spring 2022 to students in grades 5, 8 and 11 . Results are reported among performance levels 1 through 4 (from 1, "Does Not Meet Achievement Level" to 4, "Exceeds Achievement Level"). Table 4 below provides the South Windsor data for NGSS, respectively. (See DRG B comparisons in Appendix C.)

## IV. Connecticut SAT - Grade 11

The Connecticut SAT was administered in March 2022 to eleventh grade students. South Windsor's participation rate was $98.3 \%$. Table 6 below provides the South Windsor data for ELA and mathematics, respectively. The table also provides comparative data for state results. (See DRG B comparisons in Appendix D.)

## V. District Highlights and Summary

While 2021 student performance reflected expected learning loss, 2022 student performance has in most grade levels returned to pre-pandemic performance levels with a slight decline in mathematics. However, South Windsor continues to outperform state averages by at least 20 percentage points in both ELA and Math rebounding from three years of interrupted learning.

SBAC - English Language Arts: South Windsor's performance in ELA demonstrates increased achievement levels for matched cohorts of students. From 2021 to 2022 in grades 4 and 7 cohort data showed improvement in performance of 9 percentage points. Additionally, South Windsor performed competitively in our DRG with $3^{\text {rd }}$ grade performance landing at the top of the DRG.

SBAC - Mathematics: South Windsor's performance in math demonstrates slight increases for matched cohorts with the greatest gain of 6 percentage points from students who were in $6^{\text {th }}$ grade in 2021 to $7^{\text {th }}$ grade in 2022. When compared to our DRG, South Windsor math performance was competitive with our $3^{\text {rd }}$ graders having the second highest performance in the DRG.

SBAC - Subgroup Performance: Subgroup data shows that South Windsor students scored well above the state averages in ELA and math. Black or African American performance in ELA showed increases from pre-pandemic performance of 6 percentage points. In math our subgroup performance is beginning to get closer to pre-pandemic performance with Hispanic students showing the greatest gap of 12 points.

NGSS - Science: South Windsor students demonstrated consistent performance on NGSS with the exception of $11^{\text {th }}$ grade performance experiencing a 13-point decline. However, South Windsor's average performance in all 3 grades outperformed the State by almost 20 points.

NGSS - Subgroup Performance: All South Windsor subgroups outperformed the state. While most subgroup performance mirrored last year's performance our English Learners did see a 7-point decline while our White students saw a 6-point increase from 2021 to 2022.

Connecticut SAT: The South Windsor average overall SAT score experienced a 5-point increase from 2021 to 2022 closer to prepandemic performance. Our performance in ELA is 40 points over State performance and 64 points above the State average in mathematics.

## VI. Next Steps for Curriculum and Instruction

In addition to continuing to provide a rich, rigorous, engaging instruction at all levels, next steps will include:

- Implementing a common teaching and learning framework K-12
- Using data at all levels to accelerate learning
- Continuing K-12 Implementation of multi-tiered student supports and interventions
- Increasing professional learning for high school staff regarding the SAT
- Continuing integration of Portrait of a Graduate attributes explicitly into the curriculum and instructional practices
- Continued use of instructional technology to enhance learning experience
- Increasing voice and choice for staff related to professional learning
- Continuing implementation of elementary math program
- Continuing K-12 implementation of SEL framework
- Expanding use of coaches K-8 to support tier 1 instructional practices
- Expanding opportunities for STEM enrichment at the elementary level
